Outline

Part 3: Existing Resources and Benchmark Data

3.1 Existing Corpora

3.2 Debate Portals and Community Platforms

Debate Portals and Community Platforms – Overview

Slides by Henning Wachsmuth and Benno Stein

Debate portals and more

- The web as a corpus
- Relevant web resources
- Leveraging iDebate

Community platforms

- Towards a web of arguments
- Existing community platforms
- The Argument Web

The Web as a Corpus of Argumentation

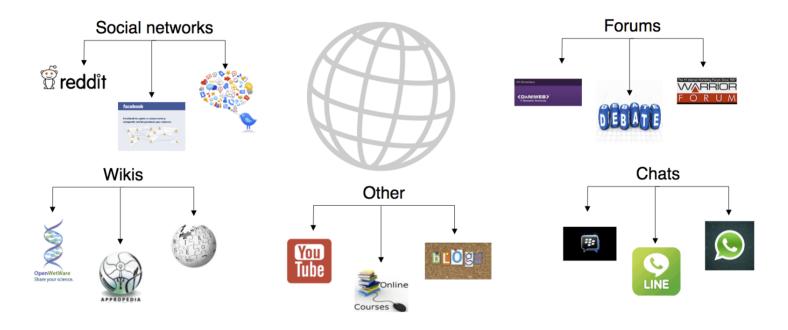

Manual annotation of argumentation is particularly expensive

• Extensive training needed, crowdsourcing problematic (Habernal 2014)

The Web as a Corpus of Argumentation

Manual annotation of argumentation is particularly expensive

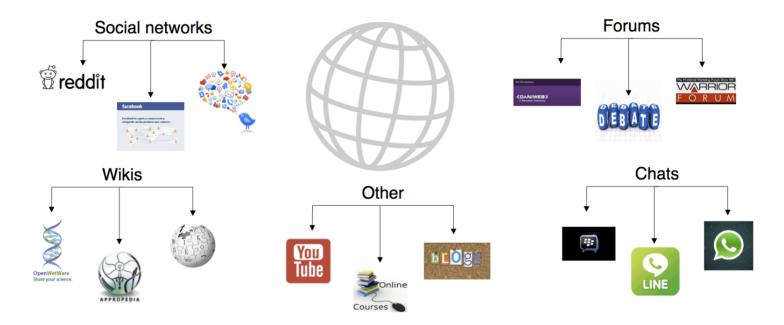

• Extensive training needed, crowdsourcing problematic (Habernal 2014)

The Web as a Corpus of Argumentation

Manual annotation of argumentation is particularly expensive

• Extensive training needed, crowdsourcing problematic (Habernal 2014)

Ground-truth labels can be acquired automatically from the web

- Controversial topics
- Argumentative texts

- Argument units and relations
- Quality assessments

NLP Approaches to Computational Argumentation – ACL 2016 Tutorial

Overview of Relevant Web Resources

Several debate platforms on the web

- Some give references for arguments: debatepedia.org
- Some score the current debate state: createdebate.com, forandagainst.com

Overview of Relevant Web Resources

Several debate platforms on the web

- Some give references for arguments: debatepedia.org
- Some score the current debate state: createdebate.com, forandagainst.com

Other accessable web resources relevant for argumentation

- Reddit generally has controversy labels (Anifowose 2016)
- Subreddit "change my view" has persuasiveness labels (Tan et al. 2016)
- Wikipedia talk pages have support and oppose labels

• ...

NLP Approaches to Computational Argumentation – ACL 2016 Tutorial

Leveraging iDebate with Distant Supervision

Debatabase at www.idebate.org

- 1k+ discussions on controversies
- Discussion: Introduction, up to 6 pro and 6 con points with counterpoints
- 14 themes: Politics, education, ...

Corpus creation with distant supervision

(Al-Khatib et al. 2016)

- Introductory sentences mapped to class "non-argumentative"
- Each (counter-) point: "argumentative"
- Premise/conclusion mapping tested but turned out complex

Corpus size and diversity beneficial for training robust classifiers

- 23,880 argumentative + 4800 non-argumentative labels for all themes
- Accessable at www.uni-weimar.de/medien/webis/corpora

Towards a Web of Arguments

Community platforms around argumentation

- Tools to create, combine, and explore structured argument data
- Facilitate critical thinking, good arguments, rational debates, ...
- · Connect the "web of arguments"

Towards a Web of Arguments

Community platforms around argumentation

Conclusion

Many web resources with arguments already exist

- Debate portals
- Semi-structured discussion forums
- Community platforms

Conclusion

Many web resources with arguments already exist

- Debate portals
- Semi-structured discussion forums
- Community platforms

Web resources can be leveraged to acquire ground-truth data

- Controversial topics and argumentative texts
- High quality arguments and their relations

Conclusion

Many web resources with arguments already exist

- Debate portals
- Semi-structured discussion forums
- Community platforms

Web resources can be leveraged to acquire ground-truth data

- Controversial topics and argumentative texts
- High quality arguments and their relations

Web resources provide extensive infrastructure

- Tools for creation, exploration, and analysis
- Standard representations such as AIF
- Literature and other references
